

DELABIE, 20 YEARS OF HUMANITARIAN ACTION BRINGING ACCESS TO WATER AND HYGIENE TO THE MOST VULNERABLE POPULATIONS

Madagascar, village water fountain. ©Eau Sans Frontières

Since 2005, DELABIE has invested its expertise in humanitarian projects to improve access to clean water and provide education for vulnerable populations. To mark 20 years of its philanthropic commitment, the company reflects on the concrete actions it has undertaken.

CONCRETE ACTIONS FOR REAL IMPACT

Over the past 20 years, DELABIE has funded 120 clean water and sanitation projects, directly impacting 90,000 people, primarily in African regions where access to water and hygiene remains a major challenge. Well drilling, installation of water tanks, and the construction of public toilets are among the tangible initiatives undertaken, always complemented by on-site training in hygiene and infrastructure maintenance to ensure long-term sustainability.

Each year, DELABIE dedicates a portion of its profits to finance these humanitarian projects.

A COLLECTIVE EFFORT

To guide its philanthropic efforts, DELABIE relies on a dedicated Committee of 12 volunteer employees.

The Committee plays a crucial role in selecting and monitoring projects. They work exclusively with renowned and reliable organisations, such as Eau Sans Frontières, Eau Vive Internationale, and Experts Solidaires, which operate in several African countries, including Madagascar, Benin, Togo, and Cameroon.

The DELABIE Philanthropy Committee ensures that at least 80% of funds allocated to its partners are directly used on the ground, guaranteeing a tangible impact for beneficiaries.

To amplify its impact, DELABIE is ready to share its experience with other like-minded organisations.

ACCESS TO CLEAN DRINKING WATER: A CHALLENGE FOR HALF A BILLION AFRICANS

- Only 31% of the population in sub-Saharan Africa has access to safely managed drinking water services.
- Only 23% of people in sub-Saharan Africa have handwashing facilities with water and soap at home.
- Only 20% of household wastewater in sub-Saharan Africa is safely treated.
- Only 79% of monitored water bodies in sub-Saharan Africa have good ambient water quality.

“Water is a common good of humanity. However, it is very unequally shared. Every human being should have the right to access clean drinking water and dignified sanitation.”

Jean-Claude Delabie, former company director and founder of this philanthropic initiative.
