

STAINLESS STEEL DRINKING FOUNTAINS

To reduce the number of plastic bottles

Refs. 180100, 180110, 180820, 180800

Over-consumption of plastic bottles

Across the globe, a staggering one million plastic bottles are sold every minute, yet only 10% of these are recycled. This means that every day, 60 millions of plastic bottles find their way into natural environments.

Environmental scientists warn that by 2025, the oceans could contain more plastic than fish.

Initiatives around the world

EU Single-Use Plastics Directive (2019)

The European Union's Single-Use Plastics Directive, introduced in 2019, bans items like straws, cutlery, and plates, and sets targets to reduce consumption of other products by 2026.

ASEAN Framework on Marine Debris (2019)

The 2019 ASEAN Framework of Action on Marine Debris focuses on policy support, research, education, and private sector engagement to combat marine debris among member states.

UNEA Resolution (2021)

In 2021, the United Nations Environment Assembly (UNEA) passed a resolution to end plastic pollution. This initiative urges countries to improve plastic collection, promote circularity, and raise awareness about the plastic crisis. It is one of the most significant global agreements since the Paris Agreement.

Reusable water bottles

As per a survey done in 2024, 60% of US adults own a reusable water bottle. Reusable water bottles are gaining popularity as environmental awareness grows. They reduce plastic waste, save money, and lower greenhouse gas emissions.

A complete range of drinking fountains

DELABIE offers a wide range of drinking fountains to help equip public and commercial buildings.

DELABIE drinking fountains are made from stainless steel, a recyclable material that contributes to sustainable development.

304 stainless steel is resistant to intensive use and vandalism (unbreakable), as well as being very light, an important factor when it comes to installation. Well-established in hospitals and professional kitchens, stainless steel is essential when it comes to hygiene, thanks to its bacteriostatic nature.

The smooth surfaces and rounded edges of these water fountains means there are fewer niches where bacteria can develop, and they are easier to clean.

DELABIE drinking fountains feature a perforated flat-grid waste with no screws. This means that they are easy to clean, and also that they are able to withstand vandalism. They are supplied with a tap that shuts off instantly, which also has an adjustable flow rate.

DELABIE stainless steel drinking fountains are available in a number of variants to suit your needs:

- wall-mounted or floor-standing models
- models with a bubbler or a swan neck tap for filling water bottles efficiently.

Ref. 180800: Wall-mounted SD drinking fountain with bubbler

Ref. 180810: Wall-mounted SD drinking fountain with swan neck tap

Ref. 180820: Wall-mounted SD drinking fountain with bubbler and swan neck tap

Ref. 180100: Floor-standing ILHA drinking fountain with bubbler (height 915mm)

Ref. 180110: Floor-standing ILHA JR drinking fountain with bubbler (height 800mm)

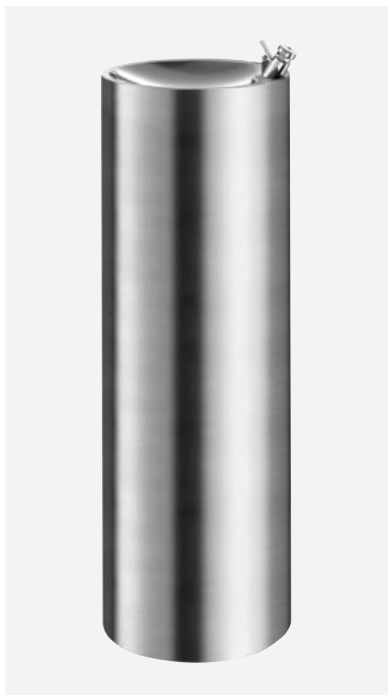

PRODUCT BRIEF / STAINLESS STEEL DRINKING FOUNTAIN

To reduce the use of plastic bottles, DELABIE offers a wide range of stainless steel drinking fountains. Fitted with a bubbler or a swan neck tap, wall-mounted or floor-standing, DELABIE drinking fountains are ideal for drinking water while reducing the use of plastic.
